Empathy Map

Understanding the customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem the project addresses.

SAYS “I never know how bad the rain is going to get until it's already flooding.” “The weather report gives numbers, not a clear yes/no answer.” “I wish there was a simple warning, like a traffic light.”	THINKS “Is this rainfall pattern similar to past floods?” “Should I move valuables to higher ground this week?” “I hope the local authority warns us early enough.”
PERSONA: Ramesh, Local Resident / Disaster Officer	
DOES - Checks the weather app several times a day during monsoon. - Calls neighbours to compare rainfall observations. - Delays action until visible signs of flooding appear.	FEELS - Anxious during heavy rainfall spells. - Frustrated by vague or delayed alerts. - Relieved when a clear, confident “safe” signal is available.
