

Project Demo Planning

Date	15 July 2026
Team ID	XXXXXX
Project Name	FloodGuard - AI/ML Flood Prediction System
Maximum Marks	1 Mark

Project Demo Planning

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Problem statement: turning raw weather data into actionable flood risk	2	Sai Ganesh
2	Solution Overview	Walkthrough of the architecture (ML pipeline → Flask API → web UI)	3	Sai Ganesh
3	Live Prediction Demo	Submit a real flood-positive and a real no-flood dataset row live	4	Sai Ganesh
4	History & Insights Walkthrough	Show the history table and the auto-generated model charts	2	Sai Ganesh
5	Deployment Walkthrough	Show the live Render URL and GitHub auto-deploy on push	2	Sai Ganesh
6	Q&A Session	Answer evaluator questions	3	Sai Ganesh

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Keep to 2 minutes; anchor on the real-world flood-warning gap
2	Solution Overview	Show the architecture diagram before touching the live app
3	Live Feature Demonstration	Use two real dataset rows: one known flood case, one known safe case
4	Q&A Session	Be ready to explain why F1-score (not accuracy) drove model selection
